

## A Vamp arc protection system for Charles de Gaulle Airport

A Vamp arc protection system will be part of EFACEC's delivery to Charles de Gaulle Airport.

A Vamp arc protection system will be part of the contract won by the switchgear manufacturer EFACEC for Charles de Gaulle Airport in Paris. EFACEC's delivery comprises the main 20kV distribution switchgear, including a digital control system and a Vamp 221 arc protection system.

Another recent delivery to EFACEC contains 15 Vamp 40 and Vamp 135 feeder protection relays. The end customer is the Beralt Tin and Wolfram Mining Company in Portugal. The 3 kV

switchgear will distribute power to the auxiliary transformers and motor pumps of a mine located in the central part of Portugal.

EFACEC Group, Portugal, is a supplier of integrated solutions and equipment for power generation, transmission and distribution. The company offers its customers a complete chain of products and services, from project to equipment manufacture and integrated solutions
