

## JRCS of Japan selects Vamp

JRCS, a leading Japanese manufacturer of marine equipment, has standardized Vamp relays for their protection systems. The company has applied Vamp multi protection relays to their switchboards since 2003 and was the first client to specify Vamp 40 for their projects. So far approximately 500 units of Vamp 210, Vamp 230 and Vamp 40 protection relays have been installed in switchboards for about 30 vessels, including LNG and container vessels.

Founded in 1948, JRCS is internationally recognized for their high-quality equipment for a wide range of vessels. The company's products are designed to meet the requirements of classification societies for complete engine, electrical and cargo control, monitoring and alarm systems, instrumentation and other associated equipment.
