

Vamp 255 feeder managers for Boliden Harjavalta Oy

Vamp Ltd will deliver feeder managers for a retrofit project at the smelter of Boliden Harjavalta Oy, Finland. The delivery includes Vamp 255 relays and communication equipment for one 1600 A /31.5 kA VEKE medium voltage industrial switchgear and will be delivered through the project's system integrator, Vaasa Engineering Oy. The switchgear is an important part of the plant's power distribution system since it is a part of the reserve supply from the local hydro power plant. The delivery of the project will take place in spring 2007.

Boliden Harjavalta Oy is part of Boliden AB, one of the world's leading mining and smelting companies with operations in Finland, Sweden, Norway and Ireland. Boliden's main products are copper, zinc, lead, gold and silver. In Harjavalta, the company produces anode copper and does nickel smelting on a tolling basis. Vamp Ltd's previous deliveries to the Harjavalta plant include feeder, motor and arc protection relays.
